PROFESSIONAL SUMMARY

Final-year BSc (Hons) Computing student at Arden University who builds full-stack applications with AI at their core, from a multilingual AI receptionist for a marketing agency to a gym system with its own AI agent and a multi-agent rental platform. I focus on making AI features reliable, not just impressive, testing them with evaluation sets before they go live, and I bring a designer's eye from UI/UX work. Looking for a Full-Stack or AI Engineering internship at a software house.

EDUCATION

BSc (Hons) Computing | Arden University | Final year
- Focus areas: programming, databases and artificial intelligence.

Foundation Year | University of London
- Subjects: Business Economics, Social Psychology and Accounting.

A-Levels and O-Levels

PROJECTS

AutoHub – AI Receptionist and Lead Automation Hub for flowpath | FastAPI, PostgreSQL, Redis, n8n, React
Live: autohub-0igb.onrender.com | flowpath site: flowpath-sigma.vercel.app
- Built an AI receptionist for flowpath, a digital marketing agency, that answers incoming leads in English, Roman Urdu, Urdu and Arabic.
- Designed a human-in-the-loop escalation flow that hands conversations to a team member when the AI is unsure, instead of guessing.
- Developed a React dashboard that shows how each lead was handled, on a FastAPI, PostgreSQL and Redis backend with n8n workflows.
- Designed and deployed flowpath's website (React, Vercel, Neon Postgres) with a grounded AI assistant that captures leads and refuses off-topic questions; it passed all 29 cases in its evaluation set.

MyFitness – Gym Management System with AI Agent | Spring Boot, Spring AI, PostgreSQL, pgvector, React
Live: myfitness-frontend.onrender.com
- Evolved a Java object-oriented (OOP) gym management system into a full-stack Spring Boot application with an AI agent built on Spring AI tool-calling.
- Implemented Retrieval-Augmented Generation (RAG) using PostgreSQL with the pgvector extension to ground agent answers in gym data.
- Built an evaluation harness to test agent behaviour, set up a CI/CD pipeline, and documented the REST API with Swagger/OpenAPI.
- Deployed the frontend and a separate API service on Render with a Neon Postgres database, including demo admin and member accounts.

LeaseFlow – Multi-Agent Rental Management System | Django, LangGraph, RAG, MCP
GitHub: github.com/aqsak-dev99/leaseflow
- Built a LangGraph supervisor-worker system in which a supervisor agent routes requests to dedicated lease, maintenance and payment agents.
- Added a verifier agent that checks worker outputs before responses are returned, and grounded agents with Retrieval-Augmented Generation (RAG).
- Integrated external tools through the Model Context Protocol (MCP) and implemented cost and token tracking for every agent run.
- Built an LLM evaluation suite and performed red-team testing against adversarial and out-of-scope inputs.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL, HTML/CSS

Backend: Spring Boot, FastAPI, Django, Node.js/Express, REST APIs

AI: Spring AI, LangGraph, Retrieval-Augmented Generation (RAG), LLM Evaluation, n8n Automation

Data & DevOps: PostgreSQL, MySQL, Redis, Git/GitHub, CI/CD, Render, Vercel

Frontend & Design: React, Figma, Responsive Design

EXPERIENCE

UI/UX Design & Frontend Development | Self-directed projects | 2024 – Present

- Designed and built responsive websites, taking them from Figma wireframes to working pages in React, HTML and CSS.
- Created concept sites for a café, a marketing studio and an AI product to practise layout, typography and accessibility.

OTHER PROJECTS

- **Diana's Jewelry** – E-commerce store (Node.js, Express, MySQL) with an AI shopping assistant that answers from the live product catalogue. Live: dianas-jewelry.onrender.com
- **Also built:** AI Todo App; ClassLink (parent-teacher app, HCI/UX); Python automation scripts.

CERTIFICATIONS

- Responsive Web Design – freeCodeCamp | August 2025 (300 hours)
- Scientific Computing with Python – freeCodeCamp | October 2025 (300 hours)

LANGUAGES & INTERESTS

Languages: English (fluent), Urdu (native)

Interests: AI agents and automation, interface design, building tools for small businesses
